## Case Systems Solutions Equips Two Detroit Medical Clinics with ÆGIS Microbe Shield® Technology Treated Casework Manufactured by Case Systems

Case Systems Solutions, a supplier of laminate furniture and casework for the educational, healthcare and laboratory markets, recently installed extensive ÆGIS Microbe Shield® technology treated casework projects for two medical clinics in Detroit.

Case Systems Solutions – Case Systems’ Michigan direct-sales team – worked with Hamilton Anderson Associates in Detroit to supply, project manage and install base and wall cabinets for Eastside Medical Clinic (4,470 ft<sup>2</sup>) and Bruce Douglas Medical Clinic (3,284 ft<sup>2</sup>).

“We needed to manufacture good-looking, laminate casework that could hold up to the wear and tear of the clinics,” said Kevin Krenzke, Regional Sales Manager, Case Systems. “The clinics opted for the ÆGIS Microbe Shield® technology to protect their high touch casework surfaces from bacteria and other microbes that can cause staining, deterioration and odors. The technology has been proven to be safe and durable – no leaching and it lasts for the life of the surface.”

“Widely used in hospital applications for a great number of years and to great effect, the ÆGIS Microbe Shield® is an ideal option for healthcare environments. We are pleased to be able to offer it exclusively for our casework applications,” said Brad Laackman, General Manager, Case Systems Solutions.

Completed first quarter of 2011, the clinics provide diverse services for Detroit area patients, including HIV/Aids, OB/GYN, pediatric, perinatal and urgent care. In addition, they offer pharmacy services and programs for health awareness, preventative medicine, healthy teens and dental care.

### For More Information

If interested in learning more about Case Systems Solutions or our treated casework and the technology behind it, please call us at 989.496.9510.

### About Case Systems Solutions

Case Systems is a provider of durable, versatile, laminate casework systems for the healthcare, education and laboratory markets. Case Systems Solutions also provides steel, height-adjustable ergonomic workstations from BOSTONtec, as well as millwork, solid surface, fume hoods and specialty products.

### About ÆGIS Microbe Shield®

ÆGIS Environments is the global source for the ÆGIS Microbe Shield antimicrobial technology, the world’s first antimicrobial for the treatment of goods which is odorless, colorless, non-leaching, long-lasting and effective against fungi, bacteria and algae. It is durable to protect the products that protect you with less stress on the environment. Though various leaching technologies still exist in the market, there is one technology that stands alone as the most advanced antimicrobial in performance and safety: ÆGIS MICROBE SHIELD.
