Case Systems Hires General Manager for New Division

MIDLAND, MI (July 13, 2010) – Case Systems, a nationally recognized leading manufacturer of laminate furniture and casework for the educational, healthcare and laboratory market, has hired Brad Laackman as General Manager for Case Systems Solutions, a new direct-contracting division serving Michigan.

Laackman comes to Case Systems from the CSM Group, a construction management firm based in Kalamazoo, where he was a Project Director and Associate Partner. Prior to that, he worked as a Health and Safety Consultant for a Grand Rapids firm and served eight years in the United States Navy, based in Japan.

Laackman specializes in transforming a customer's project vision into a reality, supervising all phases of the construction development process from initial design to installation. As General Manager of Case Systems Solutions, he will work with building owners, architects, construction managers and general contractors to offer a comprehensive, cost-effective, quality-driven and customer-focused experience.

"Brad's project management skills, construction knowledge and commitment to quality are highly valued by both Case Systems and our customers," said Rick Vander Weele, President and CEO of Case Systems.

"In addition, his business experience in marketing, consulting and customer management will be an asset as we work to build awareness and establish Case Systems Solutions as the premier dealer/contractor in Michigan," Vander Weele added.

A native of East Grand Rapids, Laackman earned his bachelor of science in construction management from Ferris State University. He lives in Midland with his wife and daughter.

About Case Systems Solutions

Case Systems Solutions works directly with Michigan clients to assess their full needs and deliver the casework, workstations and complementary products that will create a complete solution for healthcare, education and laboratory environments. Case Systems Solutions is a division of Case Systems, a leading designer and manufacturer of durable, versatile, laminate casework systems and of high quality BOSTONtec steel furniture for industrial and technical environments. All products are designed and fabricated in Midland, Michigan, and sold throughout North America.
